- All VN art is done by one man – our talented ShadowWind.
- 20+ hours of space arcade time with high replayability.

Hotline Miami is one of the best 2D run around and kill everyone type of games there is.

The music itself is not only very deep in detail and sound quality but somewhat hypnotizing.

I would compare the music in Hotline Miami to Payday 2's music. For some reason it blends very well with gameplay and for me the music in both games actually helps me concentrate.

For the music alone this game is already a 5V10 but with the gameplay, graphics story and everything combined to make the amazing game it is I cant even put this game on a scale without it receiving a perfect rating.

10V10 for everything about Hotline Miami. 6.5V10

A puzzle platformer with time travel, similar to Braid, Misadventures of Winterbottom, RePete and a couple of other games.

Pros:

- it has puzzles where you create clones of yourself, press levers etc. If you haven't played any similar games, you will find these puzzles amazing

Cons:

- the game doesn't feel unique. I mean, I have played such stuff for at least a few times already.

- the animations look clunky, and overall the 2D art looks unpolished. I can't say what exactly it is, but it just feels like a low-budget product.

Basically, Misadventures of Winterbottom but without the humor or amazing graphics. It still works, and sure go ahead and get this game if you haven't had enough of time puzzles yet.. I'd say if you enjoy OK K.O. or animation in general, this game is a must buy. It's nice to see more animation based games.. I F\*\*\*ING LOVE this game, one of my favourite point n clicks, nice humor, suitable for everyone, and it feels piratey/adventurey, the best of feelings!. I would not have minded the propaganda if the main characters would have been based on real people or if you had more choices how you play the game.. "I am neither Goku nor Vegeta, I am Gogeta. It's over Omega, I COME FOR YOU!!!!". Unfortunately this doesn't seem to open after installation, and hangs my laptop requiring a reset. I am running windows 10. Recommendation, do not purchase on steam.

But the game was great when I played it back in the day on Xbox.

---

I want to like this game, I really do, but for me, it's less than 50% playable. the fireworks map works ok, so long as I don't do more than a couple fireworks at the same time. the woods map is nice, but the mountain map, even though it's low res, gets enough frame skips to cause me motion sickness. the rainy room map looks cool, but seriously, the frame skipping is so severe that less than 1 min in that room is enough to cause me motion sickness for a couple hours after

System specs for me:

intel skylake i6-6700k

6gb ram

gigabyte factory oc gtx 970 (windforce)

This either needs some serious optimization, or else a graphics adjustment setting somewhere.

I love the concept, and will NOT be returning it, But with how rough it still is, even after the first optimization update, I can not recommend this game to others unless the optimization issues are fixed, or if you have a new pascal based nvidia graphics card (1060, 1070, 1080 etc), AND if you are looking to get your Zen on in a nice relaxing environment, then this is the game for you. but as is, that's a fairly specific subset of an already small target audience.

. Neat basebuilding quasi star trek themed game. Galactology can't be completed soon enough. I like it, but it's pretty basic on a lot of levels. No problem to beat.. There was a man, fresh out of college. He was struggling to get a job, until he finally landed one in guarding a mall. Not a glorious job, not a well paid one, but it helped pay the bills.

Then a Swede, dressed as Charles de Gaulle, smashed him to death with an active German hand grenade.

Now, you can be this crazy Swede, dressed as a Frenchman, risking his hands to ruin somebody's life.

10V10 would buy again.. Fantastic game, Cannot believe something like this turned out to be so deep and fun. Love the gangland stuff, made me feel like I am playing Saints Row 3 from a different angle while playing Prison Architect at the same time, what an ingenious combo. Management + gang warfare. Loving it so far. Can be very daunting (see the 2 guides for some basics). Can recommend it enough if you are into these genres. (I got the full package).. This is by far one of the most repetitive-boring games I've ever played. I bought this game expecting a fun strategy game to waste time with, but instead I lost out on \$5 that I could've used to buy something else. First of all, this game is extremely repetitive; the levels never change, there is absolutely no deviation from the basic formula of winning each level (spam on the first floor: win game.) Second of all, this game is not at all fun. There is nothing stimulating in it; there is no change, nothing interesting, and is just not worth it. I say this warning with all there is inside me: DONT BUY THIS GAME. DO NOT BUY IT ON SALE, DONT EVEN LOOK AT IT, AVOID IT LIKE THE PLAGUE. Spend the current price to charity, not this piece of garbage perceived as a game, you'll get a lot more out of it.. The game is fairly straightforward. Walk, collect treasures and keys go pass to the next level. Gradually, the number of steps is limited and appears portals to make the game and life more difficult. And then you have to turn on your brain. But how sweet the taste of victory, when you reach the door!

A couple of times I could not figure out how to take treasure chests. But if you want to finish the game on three stars, then please reset the level and start over.

A story goes throughout all the levels. Also I really liked that I can skip all the dialogs.

If you are not a fan of reading useless texts, just push the button and go further. But if someone decides to read these texts, then he will be amused by jokes and dialogues.

I have already finished the first chapter, perhaps I will play further. The game is indispensable in the bus, lines, etc. Great timekiller which make your brain work. That's all I wanted to say.

P.S. I noticed that if you think about the options in which direction you can go, then almost always there is a single right way in each position.. I'm not a big multi-player person, mostly because I suck at them. But this is addicting. It's a competitive footracing game, with moving obstacles and randomized race tracks. There is no single player mode, but there's also nothing here that would make it necessary. The visuals are neat, I really like the designs and colors they went for here. There's a view for 1st or 3rd person, also which is nice, you don't see options too often. I prefer 1st person myself. It's fast paced and a bunch of fun.

You can get in and out of races really quick, so you're not stuck wasting time not playing. You get different powers that you

---

can use to trip up your opponents, which can sometimes change the outcome of the race entirely. I still suck at MP, but found myself winning a couple rounds here and there, just due to some well timed powers and luck. You get a freeze power which freezes you in your tracks, another power which reverses your controls, and also one that makes you slide everywhere like there's oil slicks on your feet. You also have a shield that you can use to deflect attacks if you time it right.

All that with the randomized tracks and moving obstacles make this a fun challenge. It's not contending for any GOTY awards, but it's definitely worth the \$10 and it's a fun distraction that doesn't require a lot of commitment. I'm looking forward to seeing what else they do with this. Get a group of your friends together so you can scream obscenities at each other over skype or whatever and it's a blast.. didnt enjoy it.
