So I have started a new career as a footballer. Yay! Other Improvements: - Character stats are not allowed to be greater than one hundred. A player who is better than another in a stat must be lower. For example, if a player is 55 in goal scoring, then his player is only allowed to be 55 or less. This will protect players who get really good at a stat. - The new commentary system is better. You can now put your finger on the screen and watch the play. It's a lot better than the old system. General Changes: - A new Skill Tree was added. It will be a series of upgrades for your player. The first skill level is at the bottom, and upgrades can be added by purchasing skill points. I plan on adding in actual items that can be added to the skill tree, like boots and gloves. - We are no longer limited to 6 players. You can now play as an 8 player team. This is a huge plus, as there are only 8 players for each team. The final game is going to have a total of 128 players. - Everyone is a new character now. When the game is released, everyone will be given a new character. - Clubs are now more expensive and harder to buy. - The AI is now much better. You no longer have to keep an eye on the ball to control your player. The AI will pick up the ball and then get their player to the spot in which they are suppose to score. - The simulation engine now uses a new formula to determine the probability of certain events occurring. It's much more realistic, and the probability of something happening is far greater than in the last game. Controls: - The camera is now adjustable, meaning you can move the camera around your player. - You can now control the defenders of the opposing team. If you want to put the ball in the back of the net, you must control the defenders that are guarding the goal. - You can now see the field and the ball in real time. Final Changes: - The new scoreboard system is in place. You now have to click on the scoreboard, and the various statistics will pop up. - The camera system is being polished now, and is almost done. It's a lot better than it was. I have updated the textures on the scoreboard and am now going to add voice-overs. - I also intend to add the 82157476af
